INVESTOR PRESENTATION

Dec 2024

Important Notices

The release, publication or distribution of this presentation in certain jurisdictions may be restricted by law and therefore persons in such jurisdictions into which this presentation is released, published or distributed should inform themselves about and observe such restrictions. This presentation has been prepared based on information available as at the time of its presentation.

Forward-Looking Statements

Various statements in this presentation constitute statements relating to intentions, future acts and events. Such statements are generally classified as “forward-looking statements” and involve known and unknown risks, uncertainties and other important factors that could cause those future acts, events and circumstances to differ materially from what is presented or implicitly portrayed herein. Words such as “anticipates”, “expects”, “intends”, “plans”, “believes”, “seeks”, “estimates” and similar expressions are intended to identify forward-looking statements. Felix Gold cautions shareholders and prospective shareholders not to place undue reliance on these forward-looking statements, which reflect the view of Felix Gold only as of the date of this presentation. The forward-looking statements made in this presentation relate only to events as of the date on which the statements are made. Various statements in this presentation are also based on the circumstances of other entities. Felix Gold gives no assurance that the anticipated results, performance or achievements expressed or implied in those statements will be achieved. This presentation details some important factors and risks that could cause Felix Gold’s actual results to differ from the forward-looking statements and circumstances of other entities in this document.

References

The information in this presentation that relates to Exploration Results, Mineral Resources and Exploration Targets for Felix’s Fairbanks Gold Projects was extracted from various ASX announcements.

A copy of such announcements is available to view on the Felix Gold Limited website - <https://felixgold.investorportal.com.au/share-price-and-announcements/> - or on the ASX announcement platform. These references have also been listed in Appendix 2 - Previous Disclosures.

The reports were issued in accordance with the 2012 Edition of the JORC Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves. The Company confirms that it is not aware of any new information or data that materially affects the information included in the original market announcements. The Company confirms that the form and context in which the Competent Person’s findings are presented have not been materially modified from the original market announcements.

Historical exploration and metallurgical testwork results in this presentation referencing Siak Tan and L. J. Manning 1973 (Tan 1973”), are reported for informational purposes only and do not comply with the current JORC Code 2012. These results have not been independently verified by Felix Gold and should not be relied upon as an accurate representation of the mineralization potential. The Company intends to conduct its own exploration and metallurgical testwork programs to verify and potentially extend these historical results.

ABOUT FELIX GOLD

Felix Gold: A Globally Significant Opportunity

FELIX ANTIMONY ASSETS

ANTIMONY UP -300% YTD 2024

- One of Alaska's largest historic Antimony producers
- Production grades up to 58% Sb
- Two brownfield mines – former U.S. military supplier
- Infrastructure-rich Fairbanks Alaska location
- Center of U.S. supply chain security crisis
- Historic proven process flow sheets and resources

Felix is targeting near-term production by end 2025

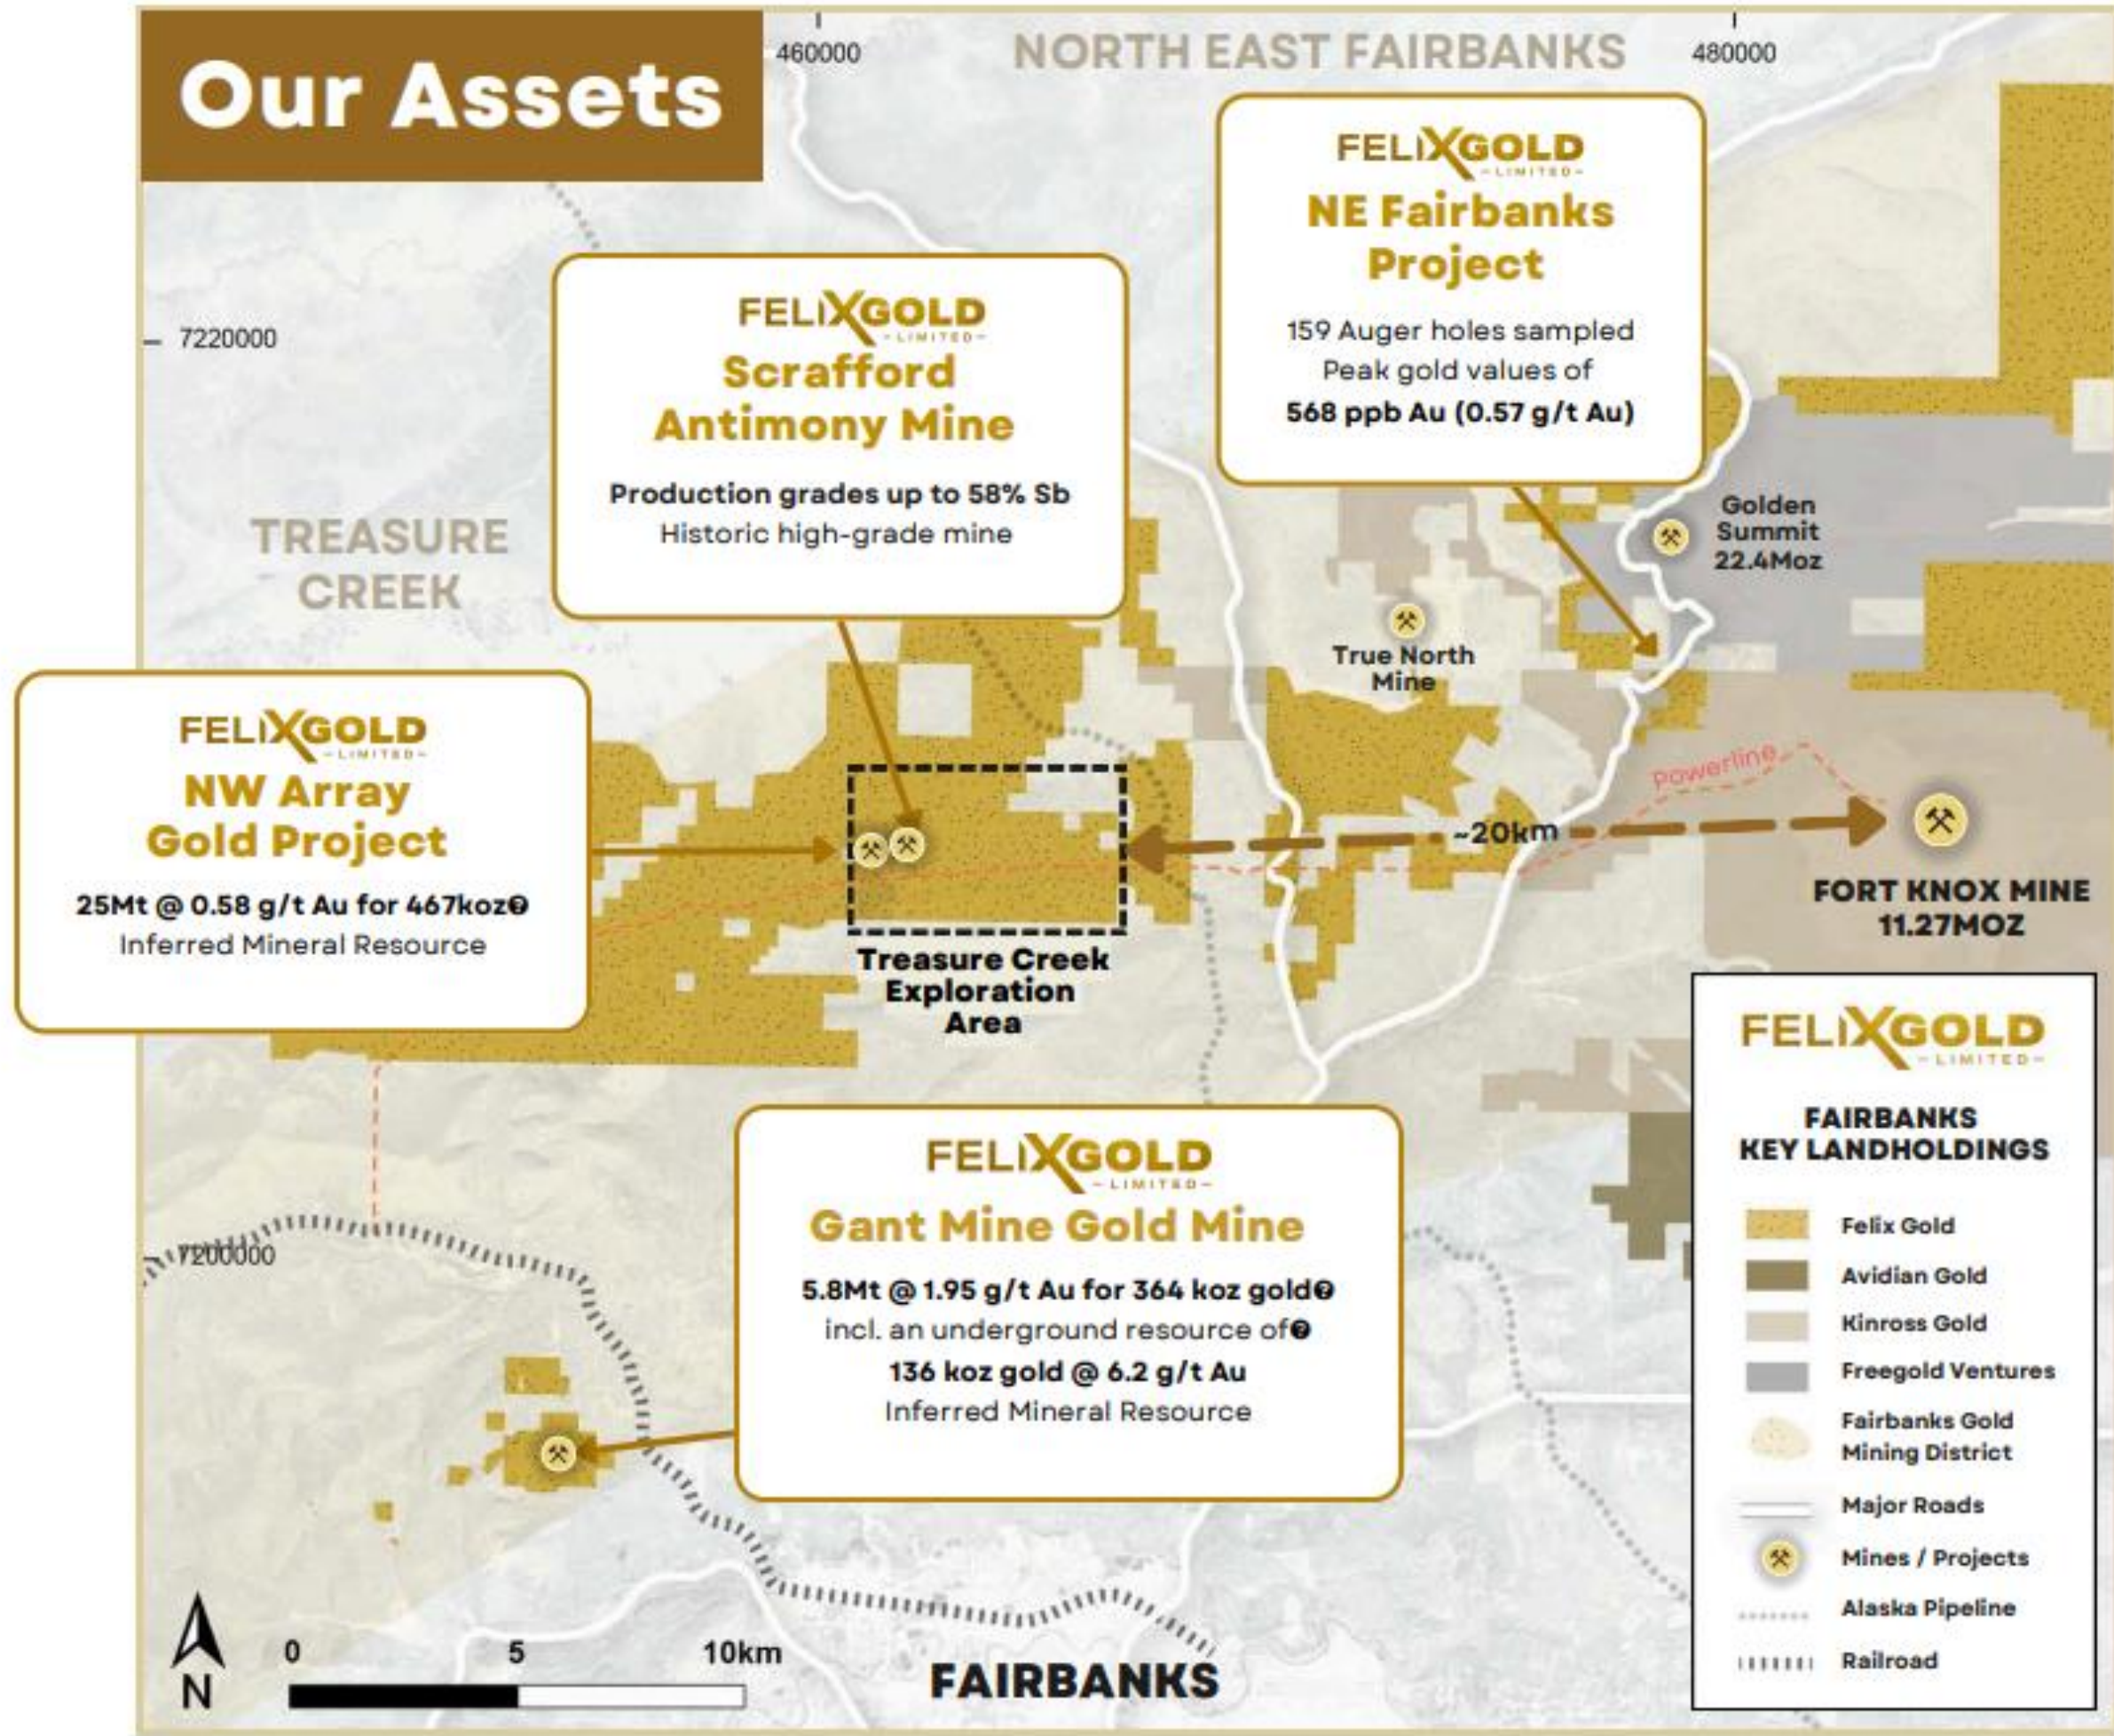

FELIX GOLD ASSETS

GOLD UP 36% YTD 2024

- Two Gold Projects
- JORC Resources of 831koz Au
- Stand-alone development potential and/or
- Direct ore supply to hungry Fort Knox Mill
- Largest landholder in Fairbanks Gold Mining District
- Infrastructure-rich location with direct mill access

Our Assets: Next to a Major Mining Centre, Fairbanks City

- **FELIX GOLD TENURE**
- **Alaskan Kalgoorlie Equivalent**
Fairbanks is Alaska's mining hub, similar to Kalgoorlie.
- **Robust Infrastructure and Utilities**
Benefits from a substantial infrastructure base and extensive utilities network.
- **Resource Efficiency**
Low-cost power and skilled workforce optimize operations
- **Strategic Location**
Projects are within 20 minutes of Fairbanks.

ANTIMONY BACKDROP

Antimony: Why is it important?

UNIQUE PROPERTIES

High flame retardancy
Strength and hardness enhancement
Thermal and electrical properties

ESSENTIAL FOR (Difficult/Impossible to Substitute)

Ammunition Primers
Fire Suppression & Vehicle Safety Systems
Night Vision Devices
Ballistic Alloys
Explosives and Detonators
Armor-Piercing Rounds
Semiconductors for radar and comms
Countermeasure Flares (infrared decoys)

SUPPLY CRISIS

China has Banned Antimony Exports (Dec '24)
~85% of Global Supply from China & Allies
0% U.S. Domestic Mining
East-West Tensions Escalating

Without antimony, U.S. military capabilities are at risk

Antimony: A National Security Imperative

U.S. Scrambles for Domestic Supply as Global Tensions Rise

2020-2023 STORM BREWING

- 85% of Global Antimony supply from China & Russia/Allies
- U.S. production ends, Pentagon flags China supply risk
- Military surges, supply squeeze begins
- \$350B+ critical minerals funding

2024 CRISIS POINT

- Global Antimony Supply Declining
- China restricts exports (Aug)
- Full China export ban announced (Dec)
- Prices spike +300% in 2024

FELIXGOLD
- LIMITED -

2025 FELIX SOLUTION

- 2 x US historic Antimony mines
- High-grades recorded (58%sb)
- Excellent infrastructure-rich Fairbanks location
- Near-term production potential
- Production target: End 2025

FELIX ADVANTAGE

- Near-term, brownfields, high-grade mine restart in the US
- Historic resources and proven process flow sheets

2026 OUTLOOK

- Growing defense demand
- Supply constraints continue
- Felix established as key U.S. supplier

FELIX GOLD — LIMITED —

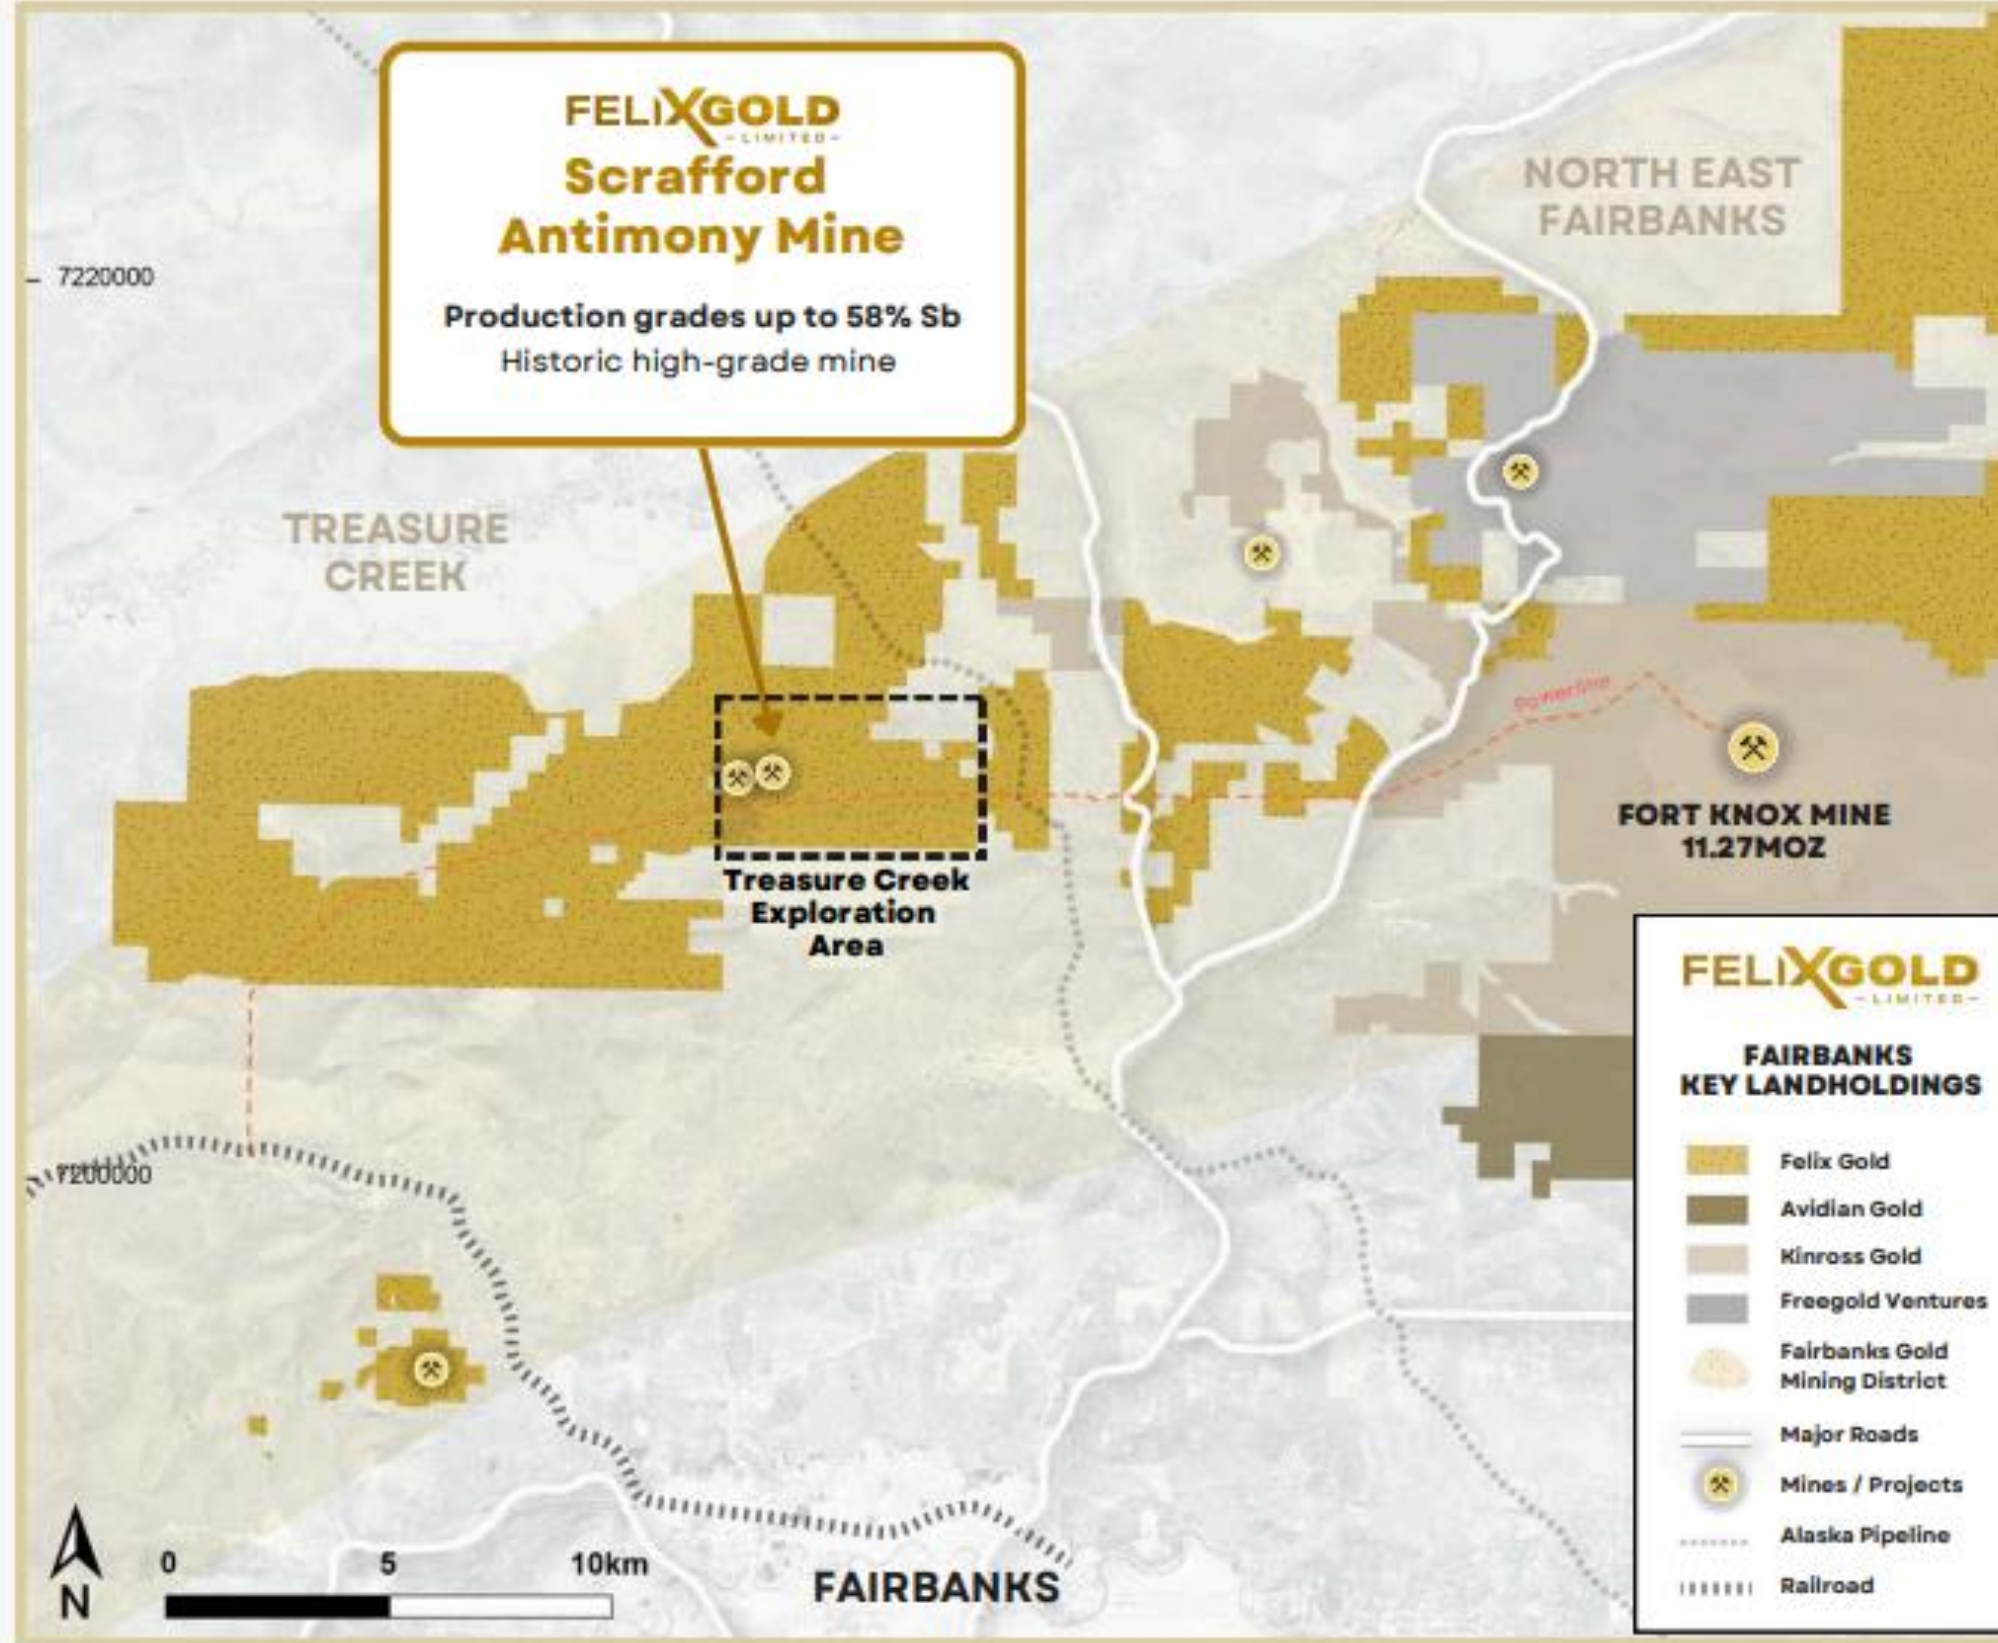

FELIX ANTIMONY ASSETS

Scrafford Antimony Mine at Treasure Creek

One of Alaska's largest historic producers of antimony with production grades up to 58% sb

Highlights

- **Intermittent operation:** 1915 - 1977
- **High-grade (past production up to 58% Sb):** Reduced processing complexity
- **Easily accessible:** Near-surface high-grade ore
- **Straightforward processing:** Gravity separation method used
- **Premium quality ore:** Due to the absence of harmful smelter impurities
- **Valuable byproducts:** Gold and silver present
- **Well-defined fault zone:** For targeted exploration
- **Proximity to Fairbanks:** provided infrastructure advantages

Antimony at Treasure Creek

Our Fast-Tracked Antimony Strategy

Felix Gold Antimony Production *Justification for a fast-tracked approach*

Brownfields Production Plan

Targeting antimony
production by 2025

5,000 tonnes per
annum target

Using proven historic
mining & processing
methods

Fast-Tracked Advantages

Small-scale brownfields
operation enables expedited
development

High-grade antimony
discovered at surface

Historical studies confirm
resource potential

Strategic Value

Aligns with U.S. domestic
production goals

Critical for national security

Well-positioned for
government funding
support

Extensive Antimony Exploration Upside

Treasure Creek is a gold-antimony system with two past-producing mines and several multiple km of structural corridors hosting antimony

Scrafford Shear Zone

+8km strike hosting the historic Scrafford Antimony Mine and Goodwin Antimony Mine.

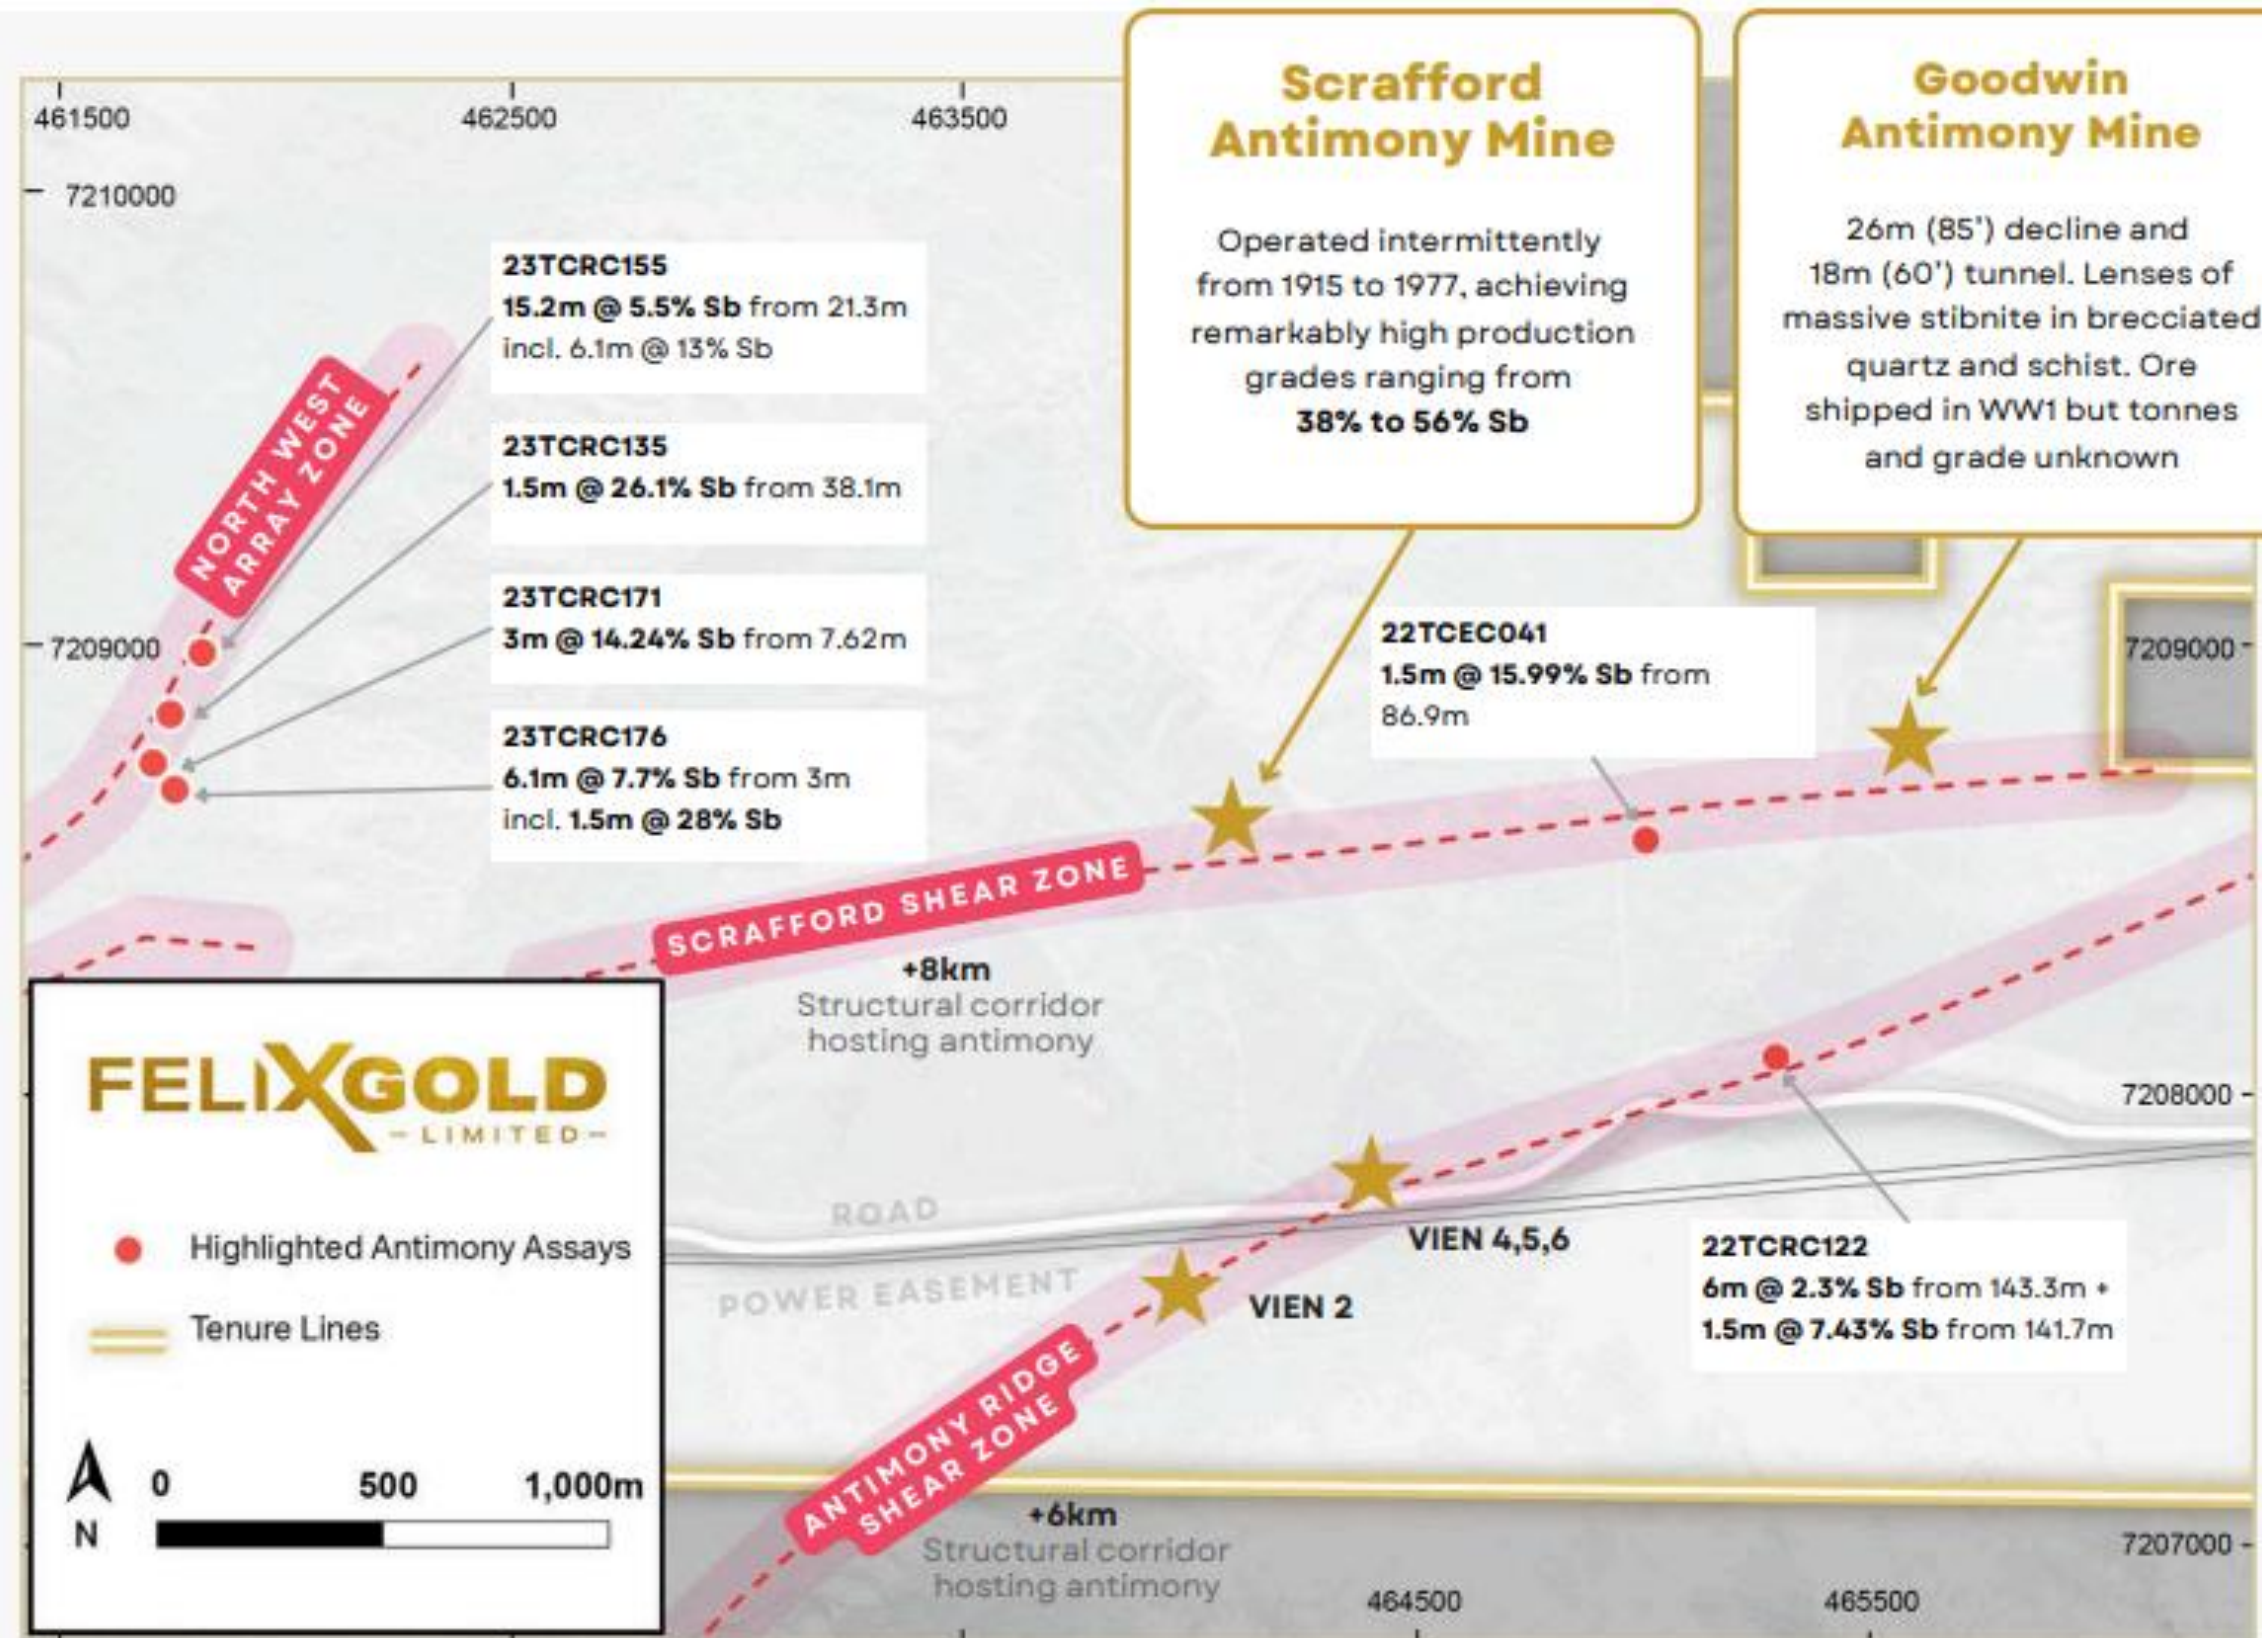

Antimony Ridge Shear Zone

+6km trend with high-grade antimony discoveries, indicating strong exploration potential.

North West Array Zone

A Felix Gold discovery of high-grade and at-surface antimony which is open.

These zones offer significant potential for resource growth and support for antimony production

Scrafford Antimony Mine
Operated intermittently from 1915 to 1977, achieving remarkably high production grades ranging from **38% to 56% Sb**

Goodwin Antimony Mine
26m (85') decline and 18m (60') tunnel. Lenses of massive stibnite in brecciated quartz and schist. Ore shipped in WW1 but tonnes and grade unknown

Environment, Community and Governance

Stakeholder Engagement

- We acknowledge and respect the presence of community and industry stakeholders.
- We are dedicated to surpassing regulatory standards and community expectations through proactive engagement.

Regulatory & Community Commitment

- In Alaska, strong traditional owner relationships, dedicated stakeholder relations, community engagement programs, and government affairs. We are committed to maintaining the trust of all stakeholders.
- Felix Gold's projects are going through the exploration and resource definition phase. If successful, this work will lead to economic assessment and project definition.
A thorough community consultation and statutory permitting process would then be carried out prior to any decision on mining.

Sustainable Practices & Commitments

Best-in-Class Regulatory Approach

We work closely with industry bodies, regulatory bodies and peers to uphold the highest standards.

Strong Community Engagement

We ensure open, transparent communication with all stakeholders, fostering strong relationships.

Integrating ESG

We commit to embedding environmental, social, and governance (ESG) principles in our operations, aiming for a positive impact on society and the environment.

The Team to Deliver

The technical, operational & commercial expertise is geared towards metals exploration success

Ronnie Beevor

Non-Executive Chairman

- 40+ years' experience in mining investment banking; previously Head of IB at Rothschild Australia over 1997 - 2002
- Director of Champion Iron, which operates the 15mtpa Bloom Lake iron ore mine in Quebec
- Recently Chairman of Bannerman Energy, which owns the Etango Uranium Project in Namibia

Joseph Webb

Executive Director

- 20+ years' global executive management experience in the resources and manufacturing industries, with previous commercial roles with Rio Tinto and Mineralogy
- Extensive commercial experience and a clear focus on the strategy, people, and processes to maximise the potential of the Company's vision

Mark Strizek

Non-Executive Director

- 27+ years' experience in the resource industry with geological, technical and development expertise
- Experience as a geologist across various gold, base and technology metal projects
- Management and Board responsibilities in exploration, feasibility, finance and development-ready assets globally

Andy Browne

Non-Executive Director

- Geologist with almost 50+ years' global experience in minerals exploration and evaluation
- Team leader in major discoveries of gold, mineral sands and uranium, including NexGen's Arrow uranium deposit, Canada
- Brings proven large-scale orebody discovery expertise

Craig McPherson

CFO & Company Secretary

- 20+ years' commercial and financial management experience, both in Australia and internationally
- Held various key executive roles with ASX- and TSX-listed companies within the resources sector over the past 15 years
- Significant acquisitions and divestments experience, corporate financing initiatives, and stock exchange listings

STRATEGIC LOCATION
U.S. assets surrounded by infrastructure

AIMING FOR NEAR TERM ANTIMONY PRODUCTION

GOLD COMMERCIALISATION PATHWAYS

Key Risks

The future performance of Felix Gold Limited may be influenced by a range of factors. Some of these factors can be mitigated, however some are outside the control of Felix Gold Limited.

Investors should consider the following risks:

- **Legislation changes/Government Policy and approvals:** Changes in government regulations and policies may adversely affect the financial performance and access to projects to undertake exploration activities. Felix Gold Limited ability to explore and exercise our options may be impacted by government policy which is beyond the control of Felix Gold Limited.
- **General economic conditions:** Changes in the general economic conditions under which Felix Gold Limited operates may adversely affect the exploration activities.
- **Permitting:** Delays in drill permitting may adversely affect the timing or ability for Felix Gold Limited to carry out the drill testing.
- **Commodity price:** The value created by any discovery may be impacted by the fluctuation of the commodity price.
- **Foreign exchange risk:** Fluctuations in relation to foreign currency may impact on the operating costs of the company.
- **Tenement compliance:** Failure of Project Owners to keep tenements in good standing could impact Felix Gold Limited ability to drill test and option targets.
- **Unforeseen expenses:** Whilst Felix Gold Limited is not aware of any expenses that may need to be incurred that have not been taken into account, if such expenses were subsequently incurred, the anticipated budgets may be adversely affected.
- **Exploration:** Minerals exploration is a high risk undertaking. Felix Gold Limited exploration program may not result in the discovery of an economic minerals deposit.
- **Operator risk:** Failure of the project operator to comply with tenement conditions which could increase costs, delay and/or loss of access to tenement to undertake drill testing.
- **Access:** Ability to access projects as planned could be disrupted because of pandemics, weather, community or other constraints.
